IT'S MY PLEASURE TO ANNOUNCE...

That Purple Martin Products by Creative Universe Ent. will be offering two new multipurpose poles, 2 new gourd racks and one aluminum house!

Im just so excited to tell you about everything! Lets start with the 2 new MPP's. Both of the new MPP's will be using out custom 3" high tensile aluminum pole, that is 16' tall. But thats where the similarities end. The new Hybrid, will hold 2 houses and 12 gourds. It's half of our heavy duty multi-pole and half of the super system. The second multi-pole, is the new Super Pole. You now have the ability to place 4 (that's right!) houses on one pole!! Then lets not forget we have the new Gemini Gourd Rack.

This is a two tiered round rack. My martins used this rack very successfully in 2008. The Gemini will also use our custom 3" high tensile aluminum pole. Last but not least there's the Great Eight. The elegant aluminum arms can accommodate either vertical hung or horizontal hung gourds. We used it here at the testing center and it to was well liked. I would constantly see martins perched on the arms. The Great Eight is 12-1/2' tall on a 2" square high tensile aluminum pole.

Continued next page.

Which brings us to the new aluminum house, the Safe Haven! We have many friends that love their aluminum houses but have found various problems with them. They challenged us to develop a aluminum house with the following features: Keep water out, large compartments, interior baffle, covered ventilation, and we met that challenge head on. We are so

pleased to present to you our very first aluminum house the Purple Martin Safe Haven! This 6 unit features large compartments 7 x 7 x 14”.

There is an interior baffle 4” deep. . The nest compartment door hinges down giving you a great view into the nest chamber. We have a aluminum nest tray for those of you who prefer them.

But the best feature of all is so simple, so fantastic, you have to wonder why it hasn’t been done before! It’s the exchangeable door plates! Its so easy, you remove the small screw which holds the small aluminum piece, remove your door and replace it with a different entrance opening.

Imagine having a house sparrow problem. You have crescent door openings. Swap out the crescent for a round hole, insert our Universal Sparrow Trap and within minutes you have that little bugger caught! Swap your door plate back to the crescent and your back in business. No fuss, no muss as the saying goes!

And lets not forget that the Safe Haven is fabricated using 032 5052 aluminum and better yet the bottom of the house is fabricated using 062. What does this mean to you? It means a very solid aluminum house. When mounting to a MPP you bolt the house directly to support arms of the MPP. Oh and by the way, the Safe Haven ships completely assembled! All hardware used in the assembly of this house is stainless or aluminum, every last nut and bolt and rivet. Now originally we were planning to offer this house with the aluminum finish, but our reviewers didn’t like it that way, (that’s okay thats how you get to be the best, listen!). so we took the Haven to a powder coating facility and had it finished, and wowza! What I thought was pretty cool, turned out better than I could imagine!

The Purple Martin Safe Haven will retail for \$239.00. You have your choice of round holes or crescent hole entrances. You can purchase additional entrance plates at \$1.95 each.

While supplies last I have a few aluminum houses (no powder coating) which I can offer for \$189.00 plus shipping.

Now for the bad news, The Safe Haven will be available in early January 2009, with limited quantities.

There is one more exciting piece of news I must share with you! During the summer of 2008 we had a custom die made to our specifications. After several attempts the die was made to perfection, and I’m pleased to announce that we will have available aluminum ground stakes for 3” poles!

Now don’t go fretting, as you start thinking to yourself how can that be? How can aluminum be stronger than steel? Well thats easy! A .19” thick wall with a 6061 T-6 temper will do the trick! Our testing indicated that the aluminum ground is stronger than the steel stake!

This is a dream come true for Robert. He has been experimenting with aluminum ground stakes since 2001. We are so pleased with the results of this that we had to take it up a notch.

You will also have the ability to add ground sleeves with your aluminum ground stake! A ground sleeve is cemented into the ground, then you slide your ground stake into the sleeve, then slide your pole over the ground stake. These sleeves will work with our 2” and 3” poles. So just how excited are you!

One last piece of new news that’s the 16 page 2009 catalog. It has been sent to the printers and should be arriving in your mail box by the new year. One of the things I tried to improve upon is to simplify the codes and shipping costs. More later about that. Want to receive your free catalog? Then e-mail me at cue@hughes.net or phone 814-833-7896 and request yours today.

You may want to receive a catalog just for the ID photos! I am also updating the web site, to reflect all the new products and it should be up by the New Year! (Continued next page).

Pricing

We have had to adjust the pricing on many of our gourd racks and accessories. On average most racks will increase in price \$10.00, some not all, and the Premium 24 has been reduced in cost. If you have been considering a new rack you may wish to purchase it before the New Year.

For 2009 I also made the shipping chart easier. Total up the merchandise and match it to the shipping chart. As always when the actual shipping charges are lower than the amount stated you will always receive the discounted rate.

Robert and I would once again like to thank ALL of you who have purchased from us, passed out one of our catalogs, and told your martin friends about us! We couldn't do this without you! We wish all of you a very Happy Holiday Season!
